AI Tool Usage Declaration

Project: AUTOSAR HLD AI Assistant: Grounded AI for High-Level Design Analysis, Engineering Q&A and Architecture Exploration

Name: Sabareesh S

Register No.: 127003218

University: SASTRA Deemed to be University

Department: Computer Science and Engineering

I disclose the following tools and models used or discussed during the development of this capstone. Their outputs must be verified against the actual submitted code, documentation, and evaluation results before final academic acceptance.

Tool / Model	Purpose and affected artifact
Google Antigravity / coding agents	Planning and assisted implementation of Python code, tests, and frontend
ChatGPT	Concept explanations, project prompts, synthetic samples, and academic documentation drafting
all-MiniLM-L6-v2	Pretrained sentence embeddings used for document and query vectors
Google Gemini API	LLM-based engineering question-answer generation from retrieved context
MockLLMProvider	Deterministic offline test double for integration and tests

Student verification: The implementation is subject to source-code inspection, unit/integration tests, and manual evaluation of generated answers and source citations. A valid citation ID alone is not proof of factual correctness.

I take responsibility for reviewing the AI-assisted work and complying with the institution's academic integrity and AI-use regulations.

The typed signature below is provided as text requested by the student, not a simulated handwritten signature.

Place: Thanjavur

Date: 20/10/2026

Signature (typed, as supplied by student): Sabareesh S
